Attn: FCC Docket 92-235

Gentlemen:

RE: Proposed Channel Splitting

I understand that you are about to adopt new rules to free up more radio frequencies. While the purpose is understandable, the effect will be fatal for our current radio system.

It is the receivers that are the problem, because they will then pick up the adjacent channels. We will have to purchase all new equipment, if the industry has it available.

This does seem like a rather drastic and costly rule to implement. Please
